

Javascript Homework 1

In this assignment you will implement a simple webpage that show how many hours, minutes, and seconds remaining today.

For instance, if current time is 18:23:54

You have 5 hours, 36 minutes and 6 seconds remaining.

For each fully or partially passed hour put ‘-’
and for each remaining hour put ‘H’.

For each fully or partially passed minute put ‘-’
and for each remaining minute put ‘m’.

For each passed second put '-'
and for each remaining second put 's'.

Your page needs to look like this.

[illegible]

Important: The page needs to be updated as time goes, i.e., each second another second needs to be removed.

Important: Don't forget adding your name and student id at the top of the webpage.

Tips:

- Start by generating an html page “jshomework1.html”
 - Write your name and title of the page.
 - Have paragraphs (<p></p>) for hour, minute and seconds.
- Write your code directly into the html page.
 - Use <script> tag for writing javascript code
- Check *Date* Object documentation to get current date and get years, minutes from there.
 - You can access hour, minute and second paragraphs using *document.getElementById(“id”)* method
- Check *window.setInterval()* method for updating the content continuously.

How to submit:

Use moodle to upload your html page.
